

ASS 77 PD.HI

The Schüco ASS 77 PD.HI sliding system (panorama design) facilitates the creation of room-height sliding systems with floor-to-ceiling glazing which allows as much light as possible to enter due to face widths from just 30 mm in the center section and a concealed outer frame. Architects and clients admire its slender profile face widths and the thermal insulation perfectly suited to any requirement. However, the system not only looks good, it also meets the highest requirements in terms of ease of use and safety.
